

ANSH UTTAM

Computer Science Engineering Student

☎ +919598855037 ✉ anshuttam4@gmail.com 🔗 LinkedIn 🐙 GitHub 📍 Chandigarh, IN

CAREER OBJECTIVE

Computer Science (AI & ML) undergraduate with hands-on experience in **Python, C/C++, SQL, React, and FastAPI**. Skilled in software development, machine learning, and problem-solving, with projects in **fraud detection and IoT-based smart home automation**. Passionate about learning new technologies and building practical solutions.

SKILLS

Databases :	MySQL
Frameworks & Libraries :	React, FastAPI
Languages :	Hindi, English
Programming Languages :	C/C++, Python, Java
Tools & Platforms :	Git, Linux
Interpersonal skill :	Teamwork, Time Management, Adaptability

CERTIFICATIONS

IBM 3-Day workshop , Prompt Engineering

EDUCATIONS

Chandigarh University | Punjab 2024 - 2028
Bachelor of Engineering in Computer Science & Engineering (AIML) CGPA : 7.2

Anubhav Inter College Murlipur Kanpur | Kanpur, Uttar Pradesh 2022 - 2023
Higher Secondary Percentage : 87.3%

Anubhav Inter College Murlipur Kanpur | Kanpur, Uttar Pradesh 2020 - 2021
Secondary Percentage : 91.3%

PROJECTS

Data Imbalancing Techniques for Fraud Detection | 🌐 Website Aug 2025 - Nov 2025
Technical Direction

- **Built a machine learning pipeline for fraud detection** using **Python and Scikit-learn**.
- **Addressed class imbalance** with SMOTE, Random Oversampling, and Random Under sampling.
- **Compared Logistic Regression, Decision Tree, and Random Forest models** using Precision, Recall, F1-Score, Accuracy, and ROC-AUC.
- **Achieved 98% accuracy** in fraud detection by improving minority-class classification and reducing false negatives.

Technologies / Tools Used : Python, Scikit-learn

IoT-Based Smart Home Automation System | 🐙 Github Jun 2024 - Sep 2024
Project Coordination

- **Architected a real-time smart home automation system** using **ESP32** and IoT sensors for seamless remote monitoring and device control.
- **Designed a cloud-connected communication pipeline** using **Wi-Fi, Blynk, and mobile applications** for secure, low-latency automation.
- **Developed intelligent automation rules** for lighting, temperature, and appliance control based on sensor data and user-defined schedules.
- **Implemented real-time monitoring** of temperature, humidity, motion, and gas sensors, enabling instant alerts and energy-efficient device management.

Technologies / Tools Used : ESP32, IoT, Wi-Fi, Blynk

ACHIEVEMENTS

- **Participated in 5+ hackathons**, gaining hands-on experience in problem-solving, teamwork, and rapid application development.
- **Build with Bharat 3.0** — Participated in the hackathon organized by **Chitkara University**.
- **Build with Bharat 2.0** — Participated in the hackathon organized by the **National Institute of Technology Delhi (NIT Delhi)**.
